
QR Sheets (Borrows)

Design Manual
Chapter 1
General Information
Originally Issued: 03-14-19

The QR sheets provide information related to borrows.

Contents of the QR Sheets

The QR sheets contain plan views and soil profile sheets, along with volume of materials available for borrow areas.

Sample QR Sheets

Click here to view [Sample QR Sheets](#).

Plan Quality Checklist

- Is the borrow identified on the sheet?
- Are mandatory borrows labeled as such? Are mandatory borrows included in the estimate reference notes?
- Is information complete (e.g., soil types, material needed, material available)?
- Is a soil profile sheet included as well as borrow layout sheet?
- If a borrow is a pond borrow, is it of appropriate design (irregular, shallow shelf, inflow/outflow compensated) with needed information (bottom elevation, water elevation, etc)?
- Are the borings labeled?
- Is station location and offset for the borrow included?
- Is the station location and offset for center of mass included?
- Are a scale and north arrow included?
