

Iowa DOT awards funding for National Electric Vehicle Infrastructure program

AMES, Iowa – Oct. 7, 2024 – The Iowa Department of Transportation has awarded over \$16.2 million to install 28 new electric vehicle (EV) direct-current, fast-charging (DCFC) stations along Iowa's interstates.

A Notice of Funding Opportunity was published in December 2023 for the first application cycle seeking to deploy EV charging infrastructure along Iowa's designated alternative fuel corridors: I-29, I-35, I-80, and I-380. Applications from 80 private entities were received for the program in March. The over \$16.2 million in NEVI funding will be matched with more than \$5.6 million in private funding. The selected sites are no more than one mile from the interstate and will include a minimum of four charging ports providing continuous charging of at least 150 kilowatts of power per port concurrently. The projects and awarded funding amounts are listed below.
