**Project Details**

- **Design No.:** 167
- **Weight of Pile:** 2,560 lbs.
- **Weight of Driving Cap (if Needed):** 500 lbs.
- **Type of Hammer:** Gravity
- **Number of Piles:** 25
- **Foundation Number:** North Abutment
- **Dimensions:** 10' x 10'
- **Total Weight:** 12,800 lbs.

**Notes:**

- All piles are driven to bedrock or refusal.
- All piles are driven with a 3:1 grade.
- All piles are driven to a depth of 40 feet.
- All piles are driven with a 1:1 grade.
- All piles are driven to a depth of 30 feet.

**Additional Notes:**

- All piles are driven with a 2:1 grade.
- All piles are driven to a depth of 20 feet.
- All piles are driven with a 1:1 grade.
- All piles are driven to a depth of 10 feet.

**Drawing Information:**

- The drawing includes sections and details for the foundation.
- The drawing includes information on the type and size of the piles.
- The drawing includes information on the driving equipment used.

**Signature:**

- Paul O. Terry
  - Resident Engineer
