

IOWA DEPARTMENT OF TRANSPORTATION

To Office Bridges and Structures Date May 1, 2008
Attention All Employees Ref No. 521.1
From Dean Bierwagen
Office Bridges and Structures
Subject Correction of 1007D and 1007E Standards
(CADD M0107)

Electronic copies are available in the following Office of Bridges and Structures standard directory **W:\Highway\BridgeStandardsBridges** and on the Internet:

<http://www.dot.state.ia.us/bridge/standard.htm>

The corrections are:

1. Additional information was added to the Granular Backfill Details showing the berm dimensions, the excavation limits from the front face of the abutment footing and separate dimensions for continuous concrete slab bridges (CCS).
2. 1'-6" dimensions were added to the abutment plan view to locate the subdrain away from the abutment footing ends.

These corrected standards should be used on all projects that have not yet been turned in. If you have any questions on the issued sheets, please check with Thayne Sorenson or Dean Bierwagen.
