

IOWA DEPARTMENT OF TRANSPORTATION

To Office Bridges and Structures Date April 1, 2014
Attention All Employees Ref No. 521.1
From Gary Novey
Office Bridges and Structures
Subject Correction of the English Miscellaneous Bridge Standards.
(CADD M0355)

Electronic copies are available in the following Office of Bridges and Structures standard directory **W:\Highway\Bridge\Standards\Bridges** and on the Internet:

<http://www.iowadot.gov/bridge/standard.htm>

Standards 2110, 2111, 2112, 2112-S, 2113, 2113-S, 2114, 2114-S & 2115 have been corrected to add a clouded note is shown in the title block stating that the designer should take note whether the deck to barrier rail bars (6c3, 6c4 & 5c5-10) are shown as epoxy coated or stainless steel and the appropriate Cadd reinforcing bar level should be used so the level and color of the bar is shown correctly in the details. Both Epoxy Coated and Stainless Steel bars are shown in the details and the on/off display of these Cadd levels determines which bar level is shown in the details.

Note: Policy on use of Stainless Steel bars will be issued in the near future. Look for this update in the Bridge Design Manual.

For any questions, please check with Stuart Nielsen or Thayne Sorenson.
