

## Consultant ProjectWise CONNECT Bridge Project Folder Structure

The XYZ-CORP subfolder under the BRPrelim or (Paren)\_Work Description subfolders of Bridge are provided as a working and submittal area for the consultant assigned to the project. The consultant folder is renamed to indicate the consultant. The appropriate permission is assigned to the folders in ProjectWise prior to the beginning of the design. There will be a folder structure provided for each consultant involved in the project.

The Bridge folder stores the project overview and 3D model files for bridges, pipes, culverts and berms related to the project. This folder will also be used by consultants so all other designers can reference from the same location regardless of the designer and stage of design. Refer to [CONNECT Bridge Project Folder Structure](#) for additional information.

The explanations of the specific use of the subfolders are provided below.

### Submittals

- Store intermittent deliverables for B01 and B02 submittals in this folder. The consultant will deliver the final TSL pdf file directly in the B01 or B02 Design Events folder. Refer to [CONNECT Bridge Project Folder Structure](#) for additional information.
