

Iowa Department of Transportation -- Contracts and Specifications Bureau

Specifications for most bid items consist of five parts:

- 1) Description, 2) Materials, 3) Construction, 4) Method of Measurement, and 5) Basis of Payment.

The Spec Codes defined below and used on the following pages identify a source(s) where typical specifications for the bid item are located. The specific source will depend on the actual use and application of the bid item. Contact eric.johnsen@iowadot.us if it is believed that any bid item has an incorrect 'Spec Code' shown.

The policy of the Contracts and Specifications Bureau is that the designer of the projects let through the Iowa DOT letting system ensures that all bid items have complete specifications.

Special attention is directed to the codes STD6, SP2, and PLAN that may use or need multiple sources. For many bid items with those codes, additional information is required. This could include entire specifications (all five parts) for a bid item, or modifications/changes/additional requirements to one or more parts of an existing specification. For the latter, the specs could be included in the Item Reference Information or General Notes of the project plan. The designer is encouraged to use the Standard Specifications, Supplemental Specifications, etc. as resources for the proper language for any of the five spec portions for similar bid items.

Spec Code	Spec Source
STD	Standard Specifications – including General Supplemental Specifications
STD2	Standard Specifications – including applicable Supplemental Specifications
STD3	Standard Specifications – including applicable Supplemental Specifications or Standard Road Plans
STD4	Standard Specifications – including applicable Standard Bridge Plans
STD5	Standard Specifications – including applicable Standard Road Plans
STD6	Standard Specifications – including applicable Special Provisions or Project Plan
DS	Developmental Specifications
SS	Supplemental Specifications
SS2	Supplemental Specifications or Project Plan
SP	Special Provisions
SP2	Special Provisions or Project Plan
SBP	Standard Bridge Plans
SRP	Standard Road Plans
PLAN	Project Plan
PROP	Proposal Form

Bid Item Descriptions

Iowa Department of Transportation -- Contracts and Specifications Bureau

Column Heading	Definition
ITEM CODE	<p>Each bid item shall have a unique twelve character number (9999-9999999).</p> <p>The first four number of the item code correspond to the section of the Standard Specifications where the requirements for the bid item are most likely to be found. The “Meas/Pay” code will further assist in locating the requirements/specifications for the bid item.</p> <p>Item Codes beginning with 2399, 2499, 2590, 2594, 2595, 2598, and 2599 are not found or referenced to a specific section of the Standard Specifications, but would most likely be considered work done under Division 23, 24, and 25 respectively of the Standard Specifications.</p> <p>NOTE: For new items or unique items, the designer may elect to use one of the item codes shown between 2599-9999001 and 2599-9999021. One item code for each of the 21 commonly used units. After selecting the appropriate “Item Code” for the corresponding unit, the designer must add a supplemental description on the plan for that item.</p>
BID ITEM DESCRIPTION	Each bid item shall have a description according to the “Method of Measurement” and “Basis of Payment” as written in the specifications, plans, etc.
UNITS	The units of measurement for a bid item shall be specified in the specifications, plans, etc.
MEAS/PAY	<p>A code (see next page) is used to direct the designer to a general source where “Method of Measurement” and “Basis of Payment” may be located. The specific source will depend on the actual use and application of the bid item.</p> <p>Special attention is directed to the codes STD6, SP2, and PLAN. For many bid items where the MEAS/PAY is STD6, SP2, or PLAN, applicable Special Provisions are required or a detail sheet in the project plan that clearly states the “Method of Measurement” and “Basis of Payment”. However, for some bid items the “Method of Measurement” and “Basis of Payment” could be included in the Item Reference Information or General Notes of the project plan.</p> <p>The designer is encouraged to use the Standard Specifications, Supplemental Specifications, etc. as resources for the proper language of “Method of Measurement” and “Basis of Payment” for similar bid items.</p> <p>The policy of the Contracts and Specifications Bureau is that the designer of projects let through the Iowa DOT letting system, insure that all bid items have a “Method of Measurement” and “Basis of Payment”.</p>

Codes

Units
