

## KEEPING YOU SAFE & INFORMED

COVID-19 RESPONSE 3-27-2020

Over the last couple of days we have asked employees to submit their health related questions regarding COVID-19.

Later tonight or early tomorrow you will receive an update letting you know how to access a video of Director Gerd Clabaugh of the Iowa Department of Public Health and Director Scott Marler answering your questions. The goal of this recorded question and answer session is to provide you with reliable and accurate information regarding the health aspects of COVID-19.

As you head into the weekend we encourage you to share this information with your friends and family. It will help arm both you, and them, with the information you need to stay safe, as well as squash rumors and misinformation that can be counterproductive to helping fight the spread of COVID-19.

We understand that this is a rapidly changing situation and you may have additional questions as time goes on. Please continue to submit your questions [via this form](#). In the coming days, we will be developing ways to answer your questions to keep you informed.
