**Concrete Barrier, BA-102 and Footing**

**Possible Contract Item:**
Concrete Barrier, BA-102 or Concrete Barrier, BA-102 and Footing.

**Possible Tabulation:**
- **Concrete Quantities**
  - Per foot: 0.14 cy

**Detail 'A'**
- Special Shaping for Barrier over Intake

**Concrete Barrier, BA-102 or BA-102 and Footing**

**REINFORCING BAR LIST**
- Per Section (Approx. 20 feet)

**SAWED CONTRACTION JOINT**
- Saw out top and front face. Saw out back if exposed.

**BENT BAR**
- 4 1/4" dia.
- 3'-2 1/2" length

**ELEVATION**
- Use Graco 60 epoxy-coated reinforcing bars. Provide 2 inches minimum cover. Anchor all reinforcement to prevent movement. Secure each section at the front, back, and at 3 foot 6 inch intervals using a method approved by the Engineer.
- Expansion joints are necessary only where specifically required by project plans. Conform expansion material to the shape of the barrier. No sealer is required.
- Where abutting sections are placed as separate pours, a butt joint may be used. Extend longitudinal reinforcement into the abutting section a minimum of 3 feet.
- For barrier dowelled to pavement, match pavement joints. For free-standing barrier with integral footings, use 17 foot maximum, 15 foot minimum joint spacing.
- Use 1 inch diameter deformed dowel bars of sufficient length to ensure 6 inch minimum embedment in barrier and supporting surface. Install dowels either in supporting surface when placed, or in drilled holes using polymer grout complying with Materials I.M. 491.11 or hydraulic cement grout complying with Materials I.M. 491.13.

**30° Lap min.**
- 5 1/2"

**SECTION A-A**
- 1.5" Lap min. x 1" deep saw cut. No sealing required.

**Possible Expansion Joint**
- or End of Barrier

**Special Shaping for Barrier over Intake**
- Fill all exposed corners with a 2 inch dressed and beveled strip.
- Construct concrete footing when barrier is not placed on concrete slab. Apply Section 2403.03, but the use of forms is optional. If forms are used, place backfill around the completed footing.
- Place barrier markers at 100 foot increments in areas with non-continuous lighting, or 250 foot increments in areas with continuous lighting. Marker color to be the same as adjacent edge line.

**REVISIONS:**
- Changed from F-shape to Texas single slope, change reinforcing.

**APPROVED BY DESIGN METHODS ENGINEER**

**STANDARD ROAD PLAN**

**BA-102**

**44" CONCRETE BARRIER**

**HALF SECTION**
