Letdown Pipe Length
B+C+E = Unclassified Roadway Letdown Pipe Length
Min. Cover equals ¾ pipe diameter

Possible Tabulation:
104-3

Refer to the following:
DR-201 for circular concrete.
DR-203 for circular metal.
DR-204 for arch metal (metal pipe only).
DR-206 for low clearance concrete with end wall.

Optional "D" Section only when specified in tabulation.
See DR-121
See DR-122.

Skew angle is the angle which one end of the pipe is ahead (by stationing) of a line perpendicular to the roadway, dike, survey, or other as detailed on the plans.

Standard type joint couplings are required. See Materials I.M. 441.

Refer to the following:
DR-201 for circular concrete.
DR-203 for circular metal.
DR-204 for arch metal (metal pipe only).
DR-206 for low clearance concrete with end wall.

Optional "D" Section only when specified in tabulation.
See DR-121
See DR-122.

Skew angle is the angle which one end of the pipe is ahead (by stationing) of a line perpendicular to the roadway, dike, survey, or other as detailed on the plans.

Standard type joint couplings are required. See Materials I.M. 441.

1. Refer to the following:
   DR-201 for circular concrete.
   DR-203 for circular metal.
   DR-204 for arch metal (metal pipe only).
   DR-206 for low clearance concrete with end wall.

2. Optional "D" Section only when specified in tabulation.

3. See DR-121

4. See DR-122.
