# E Sheets

Design Manual

Chapter 1

General Information

Originally Issued: 03-06-03

Revised: 02-10-12

---

E sheets provide overhead (plan) and side (profile) views of side roads affected by mainline construction or reconstruction. E sheets are very similar to D sheets except the centerline of the side road is usually shown instead of the mainline.

## Contents of the E Sheets

The E sheets contain Plan and Profile Sheets for the side roads (see Section [1F-5b](#)).

## Sample E Sheets

Click here to view a [Sample E Sheet](#).

## Plan Quality Checklist

- Use the D sheet checklist (see Section [1F-5](#)).
- Are side roads presented in order of occurrence?
- Are side roads labeled in the bottom right of the plan view?
- Are tie-in elevations shown in profile view?
- Are equations at tie-in labeled on plan view?

# Chronology of Changes to Design Manual Section:

## 001F-006 E Sheets

- |            |   |
|------------|---|
| 2/10/2012  | Revised<br>Updated Sample Sheet to reflect changes in Section 2A-1 (e=Normal Crown) on both horizontal curves.  |
| 12/30/2011 | Revised<br>Updated Sample Sheet to reflect changes in Section 2A-1 (e=Normal Crown).  |
| 6/30/2011  | Revised<br>Updated sample sheet to show constructed entrances as shaded, changed the unconstructed portions of the profile to a dashed line, and clarified the labeling of the beginning/ending of construction as well as the beginning/ending of the work type. |
| 2/4/2011   | Revised<br>Renamed, updated with material from previous version of 1F-7, updated to reflect current practice and added plan quality checklist.  |
