
T Sheets

Design Manual
Chapter 1
General Information

Originally Issued: 02-04-11
Revised: 08-05-16

The T sheets provide the tabulation of earthwork quantities. See Section [5C-11](#) for a list of associated bid items.

Contents of the T Sheets

The T sheets contain the Tabulation of Earthwork. The first T Sheet is a legend defining each of the areas listed in the T Sheet tabulation. The next sheet(s) will list quantities by station, and the last sheets contain the summary of quantities by stage and/or roadway, and finally, the bid items.

Sample T Sheets

Plan Quality Checklist

- Are adjusted template quantities, such as entrances, guardrail blisters, and dikes, accounted for?
- Are all of the roadways accounted for?
- Do bid items match materials shown on the tab?
- Do calculations match the shrinkage tab?

Chronology of Changes to Design Manual Section:

001F-020 T Sheets

8/5/2016	Revised Revised to reflect earthwork process and tabs. Added link to 5C-11 for bid item descriptions.
4/17/2012	Revised Removed 'by mass diagram' and distinction of material type from overhaul column of T sheet sample.
9/30/2011	Revised Updated sample T sheets to include overhaul.
2/4/2011	NEW New material.
