

# Attach a Multipage PDF to a MicroStation File

Design Manual  
Chapter 21  
Automation Tools  
Instructions  
Originally Issued: 04-17-12

From the MicroStation bar-menu, open the **Raster Manager** dialog box as follows:

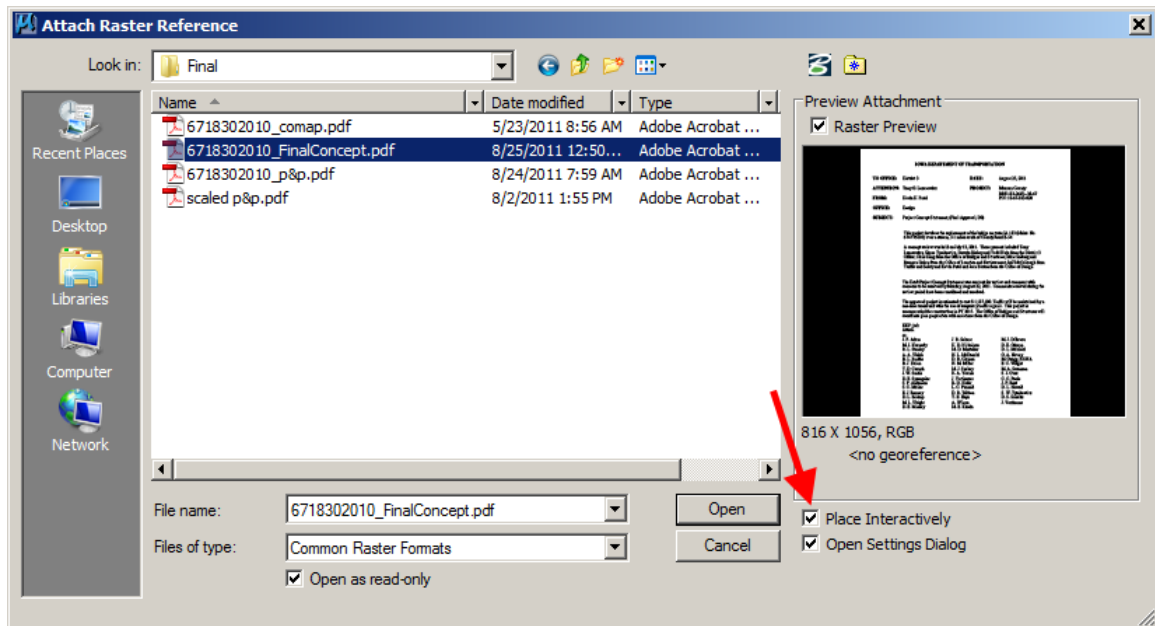

*File > Raster Manager*

From the **Raster Manager** dialog, attach the Concept Statement PDF file as a **Raster** attachment, as follows, and as shown at the right.

*File > Attach > Raster*

The action listed above should display the **Attach Raster Reference** dialog box, as shown below. **Check** () the **Place Interactively** check-box, shown by the red arrow below. Browse to locate the PDF file. Either *double-click* the file name, or *highlight* the file name and *single-click* the **Open** button.

The **Raster Attachment Options** dialog opens.

Click on **Page 1**

Select **Yes** for **Place Interactively**

Click the **Attach** button

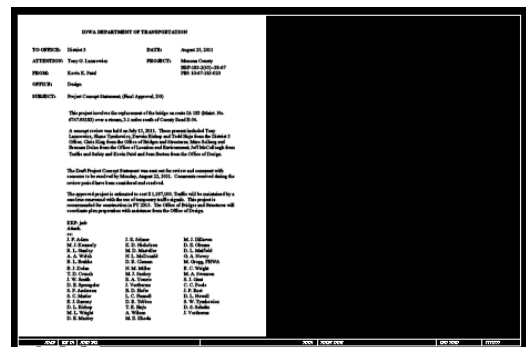

The **Enter Origin ...** command displays at the lower left corner of the MicroStation view, as shown at the right.

Click and *accept* the upper left corner of the sheet for the first point, (yellow arrow), then drag to a location on the bottom border for the second point (red arrow).

The first PDF page will appear similar to that shown at the right.

If the concept is a multipage pdf, repeat the process as described below.

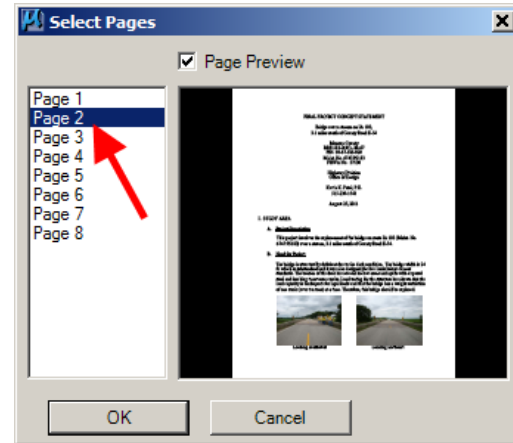

Do the *File > Attach > Raster* again, and select the same file again.

*Right Click* the file name

*Left Click* the **Page Selection** item

*Click* the next page number, as shown at the right.

*Click* the **OK** button.

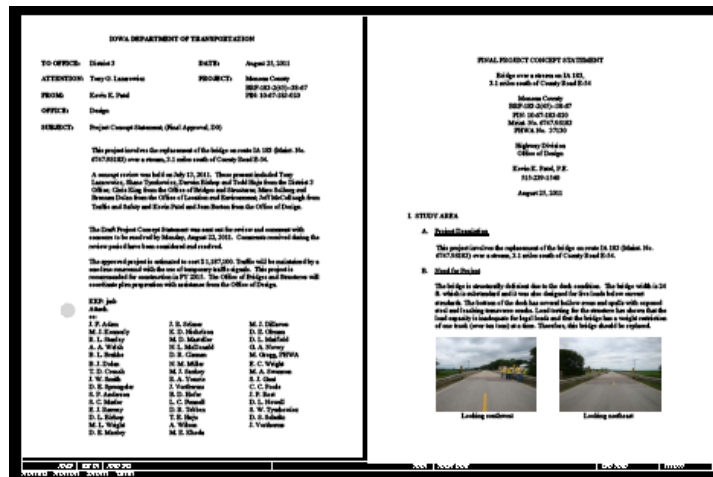

Select the new page number in the **Raster Attachment Options** dialog

Change to **Place Interactive > Yes**

*click* the **Attach** button

Place the upper left and lower right attachment points for page two, and it should look something like that shown at the right. Continue the process for additional pages.

**NOTE:** To quickly return to the same file to attach additional pages, use the “History” folder in the upper right of the **Attach Raster Reference** dialog, as shown at the right. This will display the last few “browse” locations.
