

Structural Steel – Fabrication Report

Description of Structure _____

Contractor _____

Sub-Contractor _____

Fabricator _____

Fabrication Inspector 2 _____

Date Reported _____ County _____

Date Shipped _____ Project No. _____

Weight of Structural Steel _____ Designer _____

Grade of Steel _____ Design No. _____

The material inspection of this bridge has been completed and, where checked, materials and fabricating procedures are found to comply with current Department of Transportation Standard Specifications, Supplemental Specifications and design drawings.

This report pertains to materials, procedures and the final design inspection. The design inspection includes a check of the camber, blocking, final fabricated dimensions, location of detail items and the general appearance. All items checked were found to comply with the approved drawings and design drawings unless otherwise noted later in this report.

The Mill Test Certifications were checked and found to comply with the applicable specifications for the grade of steel specified. The heat numbers found corresponded with the Mill Test Certifications.

All products of iron, steel, or a coating of steel shall meet the requirements of IM 107, Buy America.
