Purpose: This report contains Single Trailer 5-Axle Truck data collected from over ten Weigh-in-Motion sites to report how truck traffic trends have changed since Friday March 13, 2020.

## Average Weekly Single Trailer 5-Axle Truck Counts

March 13th to March 20th March 27th April 3rd to April 10th to April 17th to April 24th to May 1st to 19th to 26th\*\* to April 2nd 9th 16th 23rd 30th 7th Weigh-in-Motion Sites 5% 5% 4%

## Report Notes:

\*Due to the limited Weigh-in-Motion Sites in the sample, a comparison to the average weekly count of the 4 weeks prior to March 13th was done rather than a 2019 to 2020 comparison, as was done for the total traffic data noted above.

\*\*A correction was made changing the previously reported 3% to 5%.

• Report example, Single Trailer 5-Axle Trucks increased 5 percent over the previous month during the first week of COVID-19.
