**Purpose:** This report contains Single Trailer 5-Axle Truck data collected from over ten Weigh-in-Motion sites to report how truck traffic trends have changed since Friday March 13, 2020.

## Average Weekly Single Trailer 5-Axle Truck Counts

	March 13th to 19th	March 20th to 26th**	March 27th to April 2nd	April 3rd to 9th	April 10th to 16th	April 17th to 23rd	April 24th to 30th	May 1st to 7th
Weigh-in-Motion Sites	5%	5%	4%	1%	-10%			

**Report Notes:**

- \*Due to the limited Weigh-in-Motion Sites in the sample, a comparison to the average weekly count of the 4 weeks prior to March 13th was done rather than a 2019 to 2020 comparison, as was done for the total traffic data noted above.
- \*\*A correction was made changing the previously reported 3% to 5%.
- Report example, Single Trailer 5-Axle Trucks increased 5 percent over the previous month during the first week of COVID-19.
