

Iowa DOT | Right of Way Inventory Management System (RIMS)

A centralized system for managing Right of Way acquisition, inventory, and disposal

WHAT IS RIMS?

RIMS is Iowa DOT's map-based system for managing Right of Way parcels from project acquisition to inventory and disposal

WHY IT MATTERS

Centralized
parcel inventory

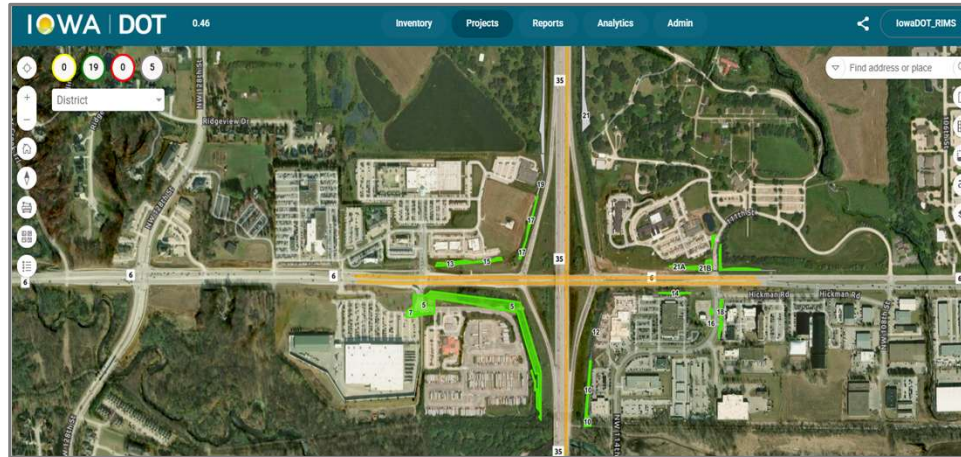

Automated
data intake

Consistent
reporting & analytics

Acquisition tracking
& parcel workflows

KEY TAKEAWAY: Manages the full Right of Way parcel lifecycle from acquisition to inventory to disposal. Centralized, map-based view of projects, parcels and ownership. Clear separation between acquisition and ownership workflows. Single source of truth supporting reporting, analytics and decision making. Integrates with existing DOT systems using automated workflows and notifications.

CORE RIMS SECTIONS

PROJECTS

Tracks Right of Way acquisition activities by project, including required parcels, project lines, and acquisition status.

INVENTORY

Displays all DOT-owned parcels after acquisition and supports parcel management, conversion, and disposal.

REPORTS

Provides standard reports for tracking inventory, acquisitions, disposals, and monthly activity.

ANALYTICS

Displays dashboards and visual summaries showing trends, counts, and inventory metrics.
