

Estimate Reference Information

Project and Program Delivery Manual
Chapter 5
Estimating Chapter
Originally Issued: 11-07-24
Revised: 07-28-25

Plan items often have an estimate reference note. The estimate reference information should refer the contractor to the appropriate tabulation, Standard Road Plan, Detail sheet, or Typical Cross Section sheet. When any of the five parts of the Specifications are not covered, they should be included in the Estimate Reference Information.

If special notes are necessary for a project, they should be placed in the estimate reference information for the plan items that are affected, regardless of the note's presence elsewhere in the plan set.

Estimate reference information can be added to individual plan items by marking the checkbox next to a plan item and clicking "Edit".

The screenshot shows the Masterworks software interface. On the left is a navigation pane with a search bar and a list of project-related tasks. The main area is divided into two tabs: 'PLANNING' and 'ITEM LIST'. The 'ITEM LIST' tab is active, displaying a table of items. The table has columns for 'Name', 'Item Description', 'Suppl. Descriptions', and 'Unit'. The 'Edit' button in the top toolbar is highlighted with a red box. In the item list, the checkbox next to item 2102-2710070 is also highlighted with a red box.

Name	Item Description	Suppl. Descriptions	Unit
<input type="checkbox"/> Roadway Items	Roadway Items		
<input type="checkbox"/> Roadside Items	Roadside Items		
<input type="checkbox"/> Erosion Control Items	Erosion Control Items		
<input type="checkbox"/> Traffic Sign Items	Traffic Sign Items		
<input type="checkbox"/> Traffic Signal Items	Traffic Signal Items		
<input type="checkbox"/> Landscaping Items	Landscaping Items		
<input type="checkbox"/> Demonstration			
<input checked="" type="checkbox"/> 2102-2710070	EXCAVATION, CLASS 10, ROADWAY AND BORROW		CY
<input type="checkbox"/> 2301-1004095	STANDARD OR SLIP FORM PORTLAND CEMENT CONCRETE PAVEMENT, QM-C, CLASS 3I DURABILITY, 9.5 IN.		SY

Estimate Reference Information

The Edit Plan Item form will open. Default Estimate Reference Information for the plan item will appear in the “Notes” field. The designer should thoroughly read the default notes and edit the information as necessary to match the intent of the plans. When finished editing the estimate reference information, click “Save & Exit” at the top of the screen.

The screenshot displays the AECO MASTERWORKS PLANNING interface. On the left is a navigation pane with various project management tools. The main area is titled 'EDIT PLAN ITEM' and contains several input fields for a plan item. The 'Save & Exit' button at the top is highlighted with a red box. The 'Notes' field at the bottom is also highlighted with a red box and contains the following text:

Includes _____ cu. yds. of suitable material to be used in the roadway fill.

Includes _____ cu. yds. of Unsuitable Type "B" material of which _____ cu. yds. is needed for roadway fill and _____ cu. yds. to be wasted according to Article 1106.07 of the Standard Specifications. Also includes _____ cu. yds. of Unsuitable Type "C" material to be used in the roadway fill.

Refer to T Sheets.

At the bottom of the form, it states 'Total Item Estimate in \$: 0.00'.

NOTE: Default Estimate Reference Information should be reviewed and edited to match the design intent for the project.
(Refer to Design Manual Chapter 01G-01 Bid Item Determination and Quality Estimation)
