Welcome to the Iowa Department of Transportation Technical Training and Certification Program (TTCP). The TTCP provides training courses in the areas of construction and materials. The program includes certifications for agencies, industry, producers, and consultants for highway materials testing and inspection. The TTCP has information and resources for you which can be found at the following address:

https://iowadot.gov/consultants-contractors/construction-materials/training/technical-training-and-certification-program-ttcp

TTCP WEBSITE INCLUDES

Special Messages regarding our training program.

Instructions on enrolling and/or cancelling an enrollment for in person, virtual and online training courses. Links for you to access:

TTCP Registration Book	TTCP Training Manuals	Certified Technicians List
Online Training	Other Resources and Technology	Contact Information
Cancellation and Refund Policy	Additional Training Videos	

ENROLLMENTS

Class schedules and locations can be found in the TTCP Registration Book. https://iowadot.gov/consultants-contractors/construction-materials/training/ttcp-information-and-registration-booklet . Enrollments are made using Workday Learning, the Iowa DOT's Learning Management System. See instructions on creating a new account and enrolling in a course https://iowadot.gov/consultants-contractors/construction-materials/training/technical-training-and-certification-program-ttcp

ONLINE REVIEWS

Online reviews are always available, and it is recommended that you view prior to attending class and prior to test day. Information on enrolling in the online reviews and other online courses is available at https://iowadot.gov/consultants-contractors/construction-materials/training/online-training . A variety of additional online courses are available in Workday Learning. **It is highly recommended** that you take the time to enroll in and watch the Math Basics and IM 204 course.

UPDATES

Erosion Control, Level I HMA and Level II PCC Updates will no longer be required for recertification. Updates continue to be offered through online training and are available from January 1st through May 31st. To take the PCC II, HMA I, or Erosion Control update online, follow the instructions at: https://iowadot.gov/consultants-contractors/construction-materials/training/online-training

REQUIRED ITEMS

Safety glasses and steel-toe shoes are required for the following labs: HMA Level I and II, PCC Level I, Aggregate Technician, and Soils. Gloves will be provided. No one is allowed in the laboratories without the required personal protective equipment. The TTCP classes will have a few extra glasses and steel toe attachments, but it is highly recommended that students bring/wear their own equipment.

Photo Identification will be required prior to testing. The student will have up to 24-hours after class to provide proper identification.

The goal of the Iowa TTCP is to work with contractors, producers, cities, counties and organizations to continually improve the quality on Iowa's construction projects by promoting education and training for technicians. Through the partnership with DMACC's Boone Campus, participants of the TTCP can learn in a state-of-the-art classroom and laboratory-setting. The TTCP is also thankful for the continued support and workshops hosted by Iowa's Aggregate, HMA, PCC, and Prestress organizations. Thank you for helping to improve the quality and success of the TTCP.
