CID Terminal Modernization - Phase 1

Before

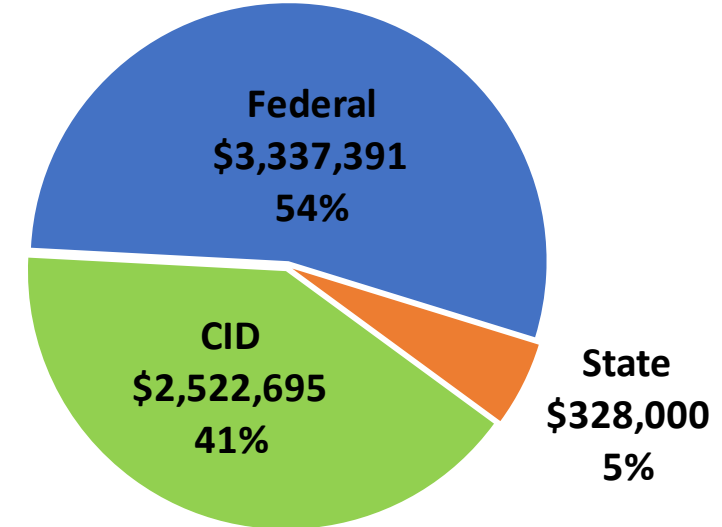

EASTERN IOWA AIRPORT

FLYCID

Terminal Modernization Project

Phase I = \$6,188,086

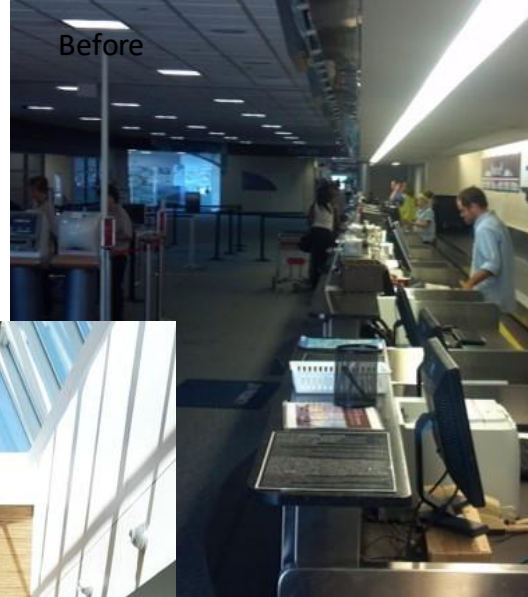

Phase 1: Exterior transformation including new facade, new windows, new curbside canopy, new curbside sidewalks, glass panel modules at existing pedestrian walkway, signage, new roof drainage and associated roof repairs, replacement of existing cooling tower, and new lighting at curbside canopy.

CID Terminal Modernization - Phase 2

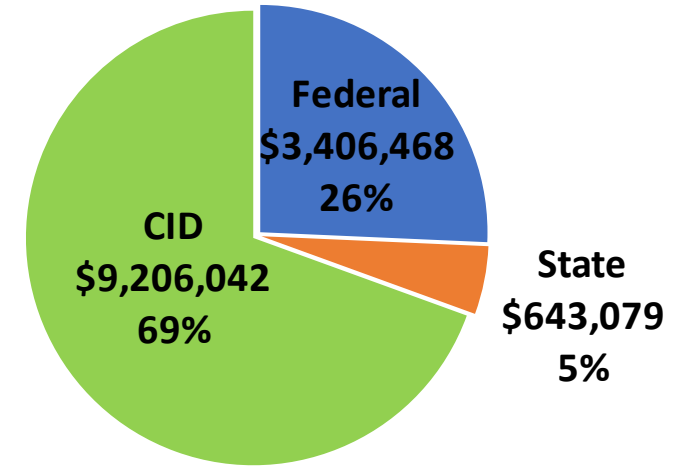

Before

Before

Terminal Modernization Project
Phase 2 = \$13,255,589

Phase 2: Complete transformation of the public space in the non-secure areas of the terminal building to include renovation of rental car and airport shuttle counters, baggage claim equipment, the checkpoint entry, expanded ticket counter space, adding skylights for more natural lighting/energy savings, and updates to the heating and cooling systems.
