IOWADOT

Iowa Mobile ID gives your business, organization, or agency a convenient, secure, and private way to verify identity and age – completely digitally!

Benefits of accepting mobile ID at your business, organization, or agency:

Trust: The state certificate verifies that the ID was issued by the issuing authority, the Iowa DOT.

Convenience: The verification process checks the information for you and lets you know if it's been authenticated or not.

Contactless: Scanning a QR code means never having to touch or access a user's device.

Customized: You only need to ask for the data required for your business transaction. (For example: age and photo for an alcohol purchase.)

Security: All security features are encrypted data with no need to decipher physical security features.

Three ways to verify age or identity with mobile ID:

1. Verify App: A verify app allows you to use a device such as a smartphone or tablet to scan the mobile ID user's QR code to verify their age/identity and be assured that they are presenting a state-issued mobile ID.

2. Software Development Kit (SDK): A mobile ID software development kit can be integrated into an existing point-of-sale system or other verification system.

3. Online Verification: Your online systems can be be configured to accept Iowa's Mobile ID to log into secure websites. Your system will generate a QR code requesting information from a mobile ID user. Once scanned and accepted, the user's information will transfer to your website.

Get started as soon as today with the Verify App:

☑ Go the App Store or Google Play and search for "Mobile ID Verify"

☑ Install and open the app

☑ Tap on "I'm ready to scan"

☑ Agree to the permissions and terms of use

☑ Start scanning!
