# 2002 SEAT BELT USAGE SURVEY 

During the autumn of 2002, 82.35 percent of motorists surveyed on all lowa roadways were wearing safety belts, an increase of nearly 1.5 percent from the previous year (see Chart 1-Seat Belt Usage).

Chart 1 - Seat Belt Usage

| Road Type | 2001 |  |  | 2002 |  |  | Percent Change |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Observed | Used | Percentage Used | Observed | Used | Percentage Used |  |
| Statewide Total* | 22,597 | 18,171 | 80.92\% | 15,078 | 12,314 | 82.35\% | 1.43\% |
| Municipal | 6,753 | 5,128 | 75.94\% | 5,741 | 4,550 | 79.25\% | 3.31\% |
| Interstate | 6,217 | 5,063 | 81.44\% | 2,145 | 1,739 | 81.07\% | -0.37\% |
| Primary | 7,831 | 6,493 | 82.91\% | 5,799 | 4,820 | 83.12\% | 0.21\% |
| Secondary | 1,796 | 1,487 | 82.80\% | 1,393 | 1,205 | 86.50\% | 3.70\% |

*Estimated statewide total usage weighted by vehicle miles traveled (see Chart 21) and 95\% confidence intervals with an estimated variance of $+/-0.29 \%$

For the second consecutive year safety belt usage increased on three of the four road systems studied. Belt usage on secondary road systems (county roads) led the way with a 3.7 percent increase over the previous year. Since more than 30 percent of all motor vehicle fatalities occur on secondary road systems, this usage increase is great news. Continued belt usage enforcement and ongoing public education for the motoring public concerning the importance of safety belt and child safety seat usage on the secondary road system, even for short distance trips, must be maintained.

Safety belt use on municipal road systems (city streets) increased 3.31 percent. This, too, is encouraging since more than 45 percent of all motor vehicle crashes occur on city streets and belt usage on the municipal road system has historically been the lowest of the road systems studied. In communities with good usage, sustained enforcement efforts and public education will further improve safety restraint use; in communities where usage is still low, intensified enforcement efforts and enhanced public education is necessary.

Primary System (U.S. and state highways) safety belt usage rose .21 percent. Since this falls within the $+/-0.29 \%$ estimated variance, actual belt usage could range from no increase to an increase of .5 percent. This drops usage on state and U.S. highways from the highest in 2001 to ranking third among the road systems. This is of concern to safety specialists because almost half of the traffic fatalities (47 percent) occur on the Primary Road System.

There was a decline in interstate belt use of -.37 percent. Since these surveys began this is only the second year that Interstate System usage has not been the highest of all the roadway systems This is the fourth decline since its highest usage rate in 1995, and may be cause for concern for safety officials due to the increasing traffic density and higher travel speeds on the Interstate System. One possible explanation for this decline is the increased number of out-of-state drivers traveling through lowa on the interstates. These drivers may not be aware of lowa's safety belt law. Increased enforcement, public education, media-supported awareness and additional signage could restore these roadways to their highest usage status.

Belt usage for 15,078 front seat occupants of cars, vans and pickups was observed at 100 locations. Of these front seat occupants, 83.45 percent of drivers $(9,537$ out of 11,428 ) and 76.06 percent of front seat passengers ( 2,777 out of 3,650 ) were observed using safety belts. For 583 front seat occupants, belt usage or non-usage could not be determined.

## Methodology

The methodology of this survey follows prior surveys by using a sample of 100 observational sites that were selected on the basis of population, geographical location, and statewide vehicle miles traveled by road system. (See Chart 17-Site Selection Listing, and Chart 18-Site Selection by County.) The surveys have primarily been conducted at the same sites since 1988. The development of the survey follows specifications of the National Highway Traffic Safety Administration ${ }^{2}$. The survey was conducted by the lowa Department of Public Safety's lowa State Patrol Troopers, between the hours of 7 a.m. and 7 p.m., Monday through Sunday. Observations were made for approximately one hour at each site.

[^0]
## Belt Law Background

The lowa law mandating seat belt usage went into effect July 1, 1986. A $\$ 10$ fine, plus court costs, was effective January 1, 1987. The fine was increased to $\$ 25$, plus court costs effective July 1, 2001. The law requires front seat occupants, age 6 and older, to properly wear a seat belt in 1966 or newer model motor vehicles. The law allows primary enforcement (i.e., officers can stop a vehicle when non-use of belts is observed). Medical exemptions and other exemptions are allowed. Children under the age of 6 are covered by the child restraint law, which went into effect January 1, 1985. The child restraint usage law requires children under age 3 to be in an approved safety seat, and children ages 3 to 6 must be in a safety seat or seat belt in any position in the vehicle. Copies of the annual child restraint survey results are also available through the lowa Department of Transportation.

## Enforcement

The safety belt law continues to be actively enforced in the state. There were 65,618 safety belt citations and 3,010 child restraint citations issued in 2001, an increase from 62,432 and 2,893 respectively, in 2000 (See Charts 14 through 16 for safety belt/child restrain citations issued). lowa's safety belt usage rates followed trends similar to those in other states, showing a large increase after fines were first imposed, increasing from 27 percent in June 1986 to 63 percent in April 1987. In September 1987, usage dropped to 56 percent, but enforcement and public education has steadily increased usage to the current 82 percent.

## Summary

The 82 percent seat belt usage rate in 2002 (up 11 percent since 1992) reflects active enforcement and education efforts that have occurred in lowa during the last few years. Through continuing education of the public, an active "Life Toll" campaign, seat belt enforcement, and other cooperative efforts between state and local law enforcement, lowa will strive to increase the use of seat belts and save more lives on lowa roadways.
