

DOT Administrative Rules Affected by 2006 Legislation

(Please note that other administrative rules may need to be updated. This list does not include all the rule changes that may be needed.)

- HF 2590 Section 2 provides for the confidentiality of information concerning security procedures or emergency preparedness information developed and maintained by a government body. The government body is required to adopt a rule or policy identifying the specific records to be confidential.
- HF 2713 Section 28 imposes rulemaking requirements. Under the bill, the DOT is required to adopt rules prescribing the manner by which cities and counties shall provide a detailed cost accounting under Code sections 309.93 or 312.14 of all instances of the use of day labor or public or private contracts for construction, reconstruction, or improvement projects of a highway, bridge or culvert within their jurisdiction. Previously, this requirement did not include bridges and culverts.
- A new rulemaking requirement directs the DOT to adopt rules prescribing the manner by which governmental entities administer competitive quotations for public improvement contracts under new Code section 38.14. Section 28 is effective upon enactment, March 29, 2006.
- HF 2782 Section 55 establishes a Public Transit Infrastructure Grant Fund and requires the DOT to adopt rules to specify criteria that must be included in a grant application.
