RFP_SPR-4003

Safety Impacts of Parent Taught Driver Education

Questions and Responses

Q1) The RFP seems to suggest that there is a reasonable database, about 13,000 records that are available for analysis for this project. Is that readily available and accessible for this project?

R1) Iowa DOT will download data for use by the researcher consisting of relevant Driver License Records that identifies whether the individual used Parent Taught Driver Education to satisfy the Driver Education requirements, along with conviction, sanction, and basic demographic data. The exact structure of the database files and data fields available can be discussed as the project begins.

Records consisting of basic demographic data and survey contact information for the teaching parent(s) exists only in the individually submitted Application for Parent-Taught Driver Education Program Completion form, a blank copy of which is attached to the RFP. The submitted information does not exist in database form.
