FREIGHT GOALS

SAFETY

Improve the **safety, security, and resilience** of the national freight system.

- Support the development and adoption of automation, connectivity, and other freight safety **technologies**
- Modernize safety oversight and security **procedures**
- Minimize the effects of **fatigue and human error** on freight safety
- Reduce **conflicts** between passenger and freight traffic
- Protect the freight system from natural and human-caused disasters and improve **recovery speed**
Modernize freight infrastructure and operations to grow the economy, increase competitiveness, and improve quality of life.

- Fund targeted investments in freight capacity
- Improve consideration of freight in transportation planning
- Prioritize projects that improve freight intermodal connectivity, and enhance freight flows on first- and last-mile connectors and at major trade gateways
- Advance freight system management and operation practices
- Improve job growth and economic competitiveness in rural and urban communities
- Mitigate the impacts of freight movement on communities
Prepare for the future by supporting the development of data, technologies, and workforce capabilities that improve freight system performance.

- Support the development and adoption of automation and V2X
- Support the safe deployment of UAS technology
- Streamline regulations to improve governance, efficiency, and economic competitiveness
- Improve freight data, modeling, and analysis tools and resources
- Strengthen workforce professional capacity
- Invest in freight research
- Support regulatory frameworks that foster freight innovation
