Please consider the following notes regarding the Certified Technicians Book:

1) This is a living document that is being continuously updated as information is received. The date listed on the second page of the book is the date last published.

2) **Please note that there has been a change in certification expiration dates:**

Previously – Certificates expired on 12/31 at the end of their certification period and there was a 90-day "grace period" in which to recertify. The certified technician actually had until 3/31 of the following year in which to recertify without a break in certification.

Currently – There will no longer be a "grace period". All certificates will expire on 3/31 at the end of their certification period.

Due to this change, all current certificates have had their certification end dates adjusted from 12/31/XX to 3/31/XX+1, with XX being the year of the previous expiration date of the certificate. For example, if you had a certificate scheduled to expire 12/31/24, it is now listed as expiring 3/31/25. Recertification classes will be offered as usual during the December – March time frame.

3) Starting with the 2015-2016 training season, there will be a different format for newly assigned TTCP Certification Numbers. The new format will be a unique six digit number. The first digit will represent the District in which the Certified Technician lives. The second and third digits are the last two digits of the year of initial certification. The remaining three digits are randomly assigned. For example, a new Certified Technician who lives in Des Moines became certified this training season. Their certification number would be 125aaa, where "aaa" represents a random, three-digit sequence of numbers. Certified Technicians that already have certification numbers will continue to use those numbers at this time.

4) Please send any corrections or questions to:

Brian Squier
