Information and registration are available through the IRMCA.

February 6-7, 2023

Work Zone Safety Workshops

This course introduces the principles and conveys the importance of using proper methods for safe and efficient traffic control at work sites. It examines some specific applications relevant to situations normally encountered by city, county, utility, contractor, and Iowa DOT crews. This course is for all workers whose duties place them within or near the traveled-portion of the roadway, and their supervisors. Each day-long workshop is divided into a general session for all participants and breakout sessions according to specific types of work zone activity: city, county, utility, Iowa DOT construction, and Iowa DOT maintenance. For information on this workshop DOT employees should contact Steven Schroder at 515-239-1623 and non-DOT employees should contact Keith Knapp at 515-294-8817.

Civil Engineering Technology

Des Moines Area Community College (DMACC), Boone Campus, offers a Civil Engineering Technology Program. This program prepares the student for a career as a technician in the areas of design, construction, and inspection. Upon completion of the program, graduates will have a working knowledge of surveying equipment, industry-based computer software, and laboratory testing instruments. When an individual completes this program and passes the certification tests administered by the Iowa DOT Technical Training and Certification Program, they will be certified in Aggregate Technician; Level I and Level II PCC; and Level I HMA, Soils Technician and Erosion Control Technician. Contact Renee White at DMACC, Boone at 515-433-5056 for more information on the program.
